Summary

This dataset is used by the City of Austin to locate the buffers around landfills. Not all landfills will necessarily be included. This dataset was created in the year 2007. There are restrictions to development for properties that are within the landfills buffers.

Description

This layer represents the buffered geography around the known landfills in and around the City of Austin, Texas. Due to the uncertainty of the boundaries of the landfills; the buffers are used to regulate development in close proximity to the landfills. Areas of known landfill boundaries utilize the 200' buffer. Areas where general knowledge of the landfill location is known utilize a 1500' buffer.
